16. Specific Goals in terms of section 2 (1) (d) (i) and (ii) of the Preferential Procurement Policy Framework Act

16.1 Broad-based black economic empowerment (B-BBEE) status level certificates

Bidders are required to submit original and valid B-BBEE Status Level Verification Certificates or certified copies of the original, not a photo-copy of another certified copy thereof together with their bids, to substantiate their B-BBEE rating claims.

Bidders who do not submit B-BBEE Status Level Verification Certificates or who are non-compliant contributors to B-BBEE do not qualify for preference points for B-BBEE but should not be disqualified from the bidding process. They will score points out of 90 or 80 for price only and zero (0) points for B-BBEE.

A trust, consortium or joint venture must submit a consolidated B-BBEE Status Level Verification Certificate for every separate bid.

Public entities and tertiary institutions must also submit B-BBEE Status Level Verification Certificates together with their bids.

If an institution is already in possession of a valid and original or certified copy of a bidder's B-BBEE Status Level Verification Certificate that was obtained for the purpose of establishing the database of possible suppliers for price quotations or that was submitted together with another bid, it is not necessary to obtain a new B-BBEE Status Level Verification Certificate each time a bid is submitted from the specific bidder.

Such a certificate may be used to substantiate B-BBEE rating claims provided that the closing date of the bid falls within the expiry date of the certificate that is in the institution's possession.

Each time this provision is applied, cross-reference must be made to the B-BBEE Status Level Verification Certificate already in possession for audit purposes.

AOs / AAs must ensure that the B-BBEE Status Level Verification Certificates submitted are issued by the following agencies:

Bidders other than EMEs

- Verification agencies accredited by SANAS; or
- Registered auditors approved by IRBA (until the expiration of the period prescribed by the DTI)

Bidders who qualify as EMEs

- Sworn affidavit signed by the EME representative and attested by a Commissioner of oaths.

The list is accessible on http://www.sanas.co.za/directory/bbee_default.php.

The relevant BVA may be contacted to confirm whether such a certificate was issued.

As a minimum requirement, all valid B-BBEE Status Level Verification Certificates should have the following information detailed on the face of the certificate:

- The name and physical location of the measured entity;
- The registration number and, where applicable, the VAT number of the measured entity;
- The date of issue and date of expiry;
- The certificate number for identification and reference;

- Clearly identify the B-BBEE approved registered auditor by the auditor's individual registration number with IRBA and the auditor's logo.
- Clearly record an approved B-BBEE Verification Certificate identification reference in the format required by the SASAE;
- Reflect relevant information regarding the identity and location of the measured entity.

- Reflect that the B-BBEE Verification Certificate and accompanying assurance report issued to the measured entity is valid for 12 months from the date of issuance and reflect both the issuance and expiry date.

Confirmation of the validity of a B-BBEE Status Level Verification Certificate can be done by tracing the name of the issuing B-BBEE approved registered auditor to the list of all approved registered auditors. The list is accessible on <http://www.thedti.gov.za> and / <http://www.irba.co.za>.

The relevant approved registered auditor may be contacted to confirm whether such a certificate was issued.

Accounting officers as contemplated in section 60(4) of the CCA;

These certificates will be issued on the accounting officer's letterhead with the accounting officer's practice number and contact number clearly specified on the face of the certificates.

The content of B-BBEE Status Level Verification Certificates issued by accounting officers as contemplated in the CCA is detailed in paragraph 4.8.5 below.

VERIFICATION OF B-BBEE LEVELS IN RESPECT OF EMEs

In terms of the Generic Codes of Good Practice, an enterprise including a sole propriety with annual total revenue of R10 million or less qualifies as an EME.

In instances where Sector Charters are developed to address the transformation challenges of specific sectors or industries, the threshold for qualification as an EME may be different from the generic threshold of R10 million. The relevant Sector Charter thresholds will therefore be used as a basis for a potential bidder to qualify as an EME.

- For example, the approved thresholds for EMEs for the Tourism and Construction Sector Charters are R2.5 million and R1.5 million respectively.
- An EME automatically qualifies as a level 4 contributor with B-BBEE recognition level of 100% in terms of the Codes of Good Practice.

- An EME that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as Level 1 contributor with B-BBEE level of 135% in terms of Codes of Good Practice.
- An EME that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- An EME is required to submit a sworn affidavit confirming their annual total revenue of R 10 million or less and level of black ownership to claim points
- An EME that is regarded as a Specialized Enterprise, is required to submit a sworn affidavit confirming their annual turnover/ allocated budget/ gross receipt of R 10 million or less and level of percentage of black beneficiaries to claim points
- An EME may be measured in terms of the QSE scorecard should they wish to maximize their points and move to a higher B-BBEE recognition level. It is in this context that an EME may submit a B-BBEE verification certificate.

ELIGIBILITY AS QUALIFYING SMALL ENTERPRISES (QSE)

The Codes define a QSE as any enterprise with annual total revenue of between R10 million and R50 million.

- A QSE with at least 51% black ownership qualifies as a Level 2 contributor.
- A QSE with 100% black ownership qualifies as a Level 1 Contributor.
- A QSE that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as a Level 1 contributor with B-BBEE level of 135% in terms of the Codes of Good Practice.
- A QSE that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- A QSE is required to submit a sworn affidavit confirming their annual total revenue of between R10 million and R 50 million and level of black ownership or a B-BBEE level verification certificate to claim points
- A QSE that is regarded as a specialized enterprise is required to submit a sworn affidavit confirming their annual turnover/ budget/ gross receipt of R 50 million or less and level of percentage of black beneficiaries or a B-BBEE level verification certificate to claim points

F. SPECIAL CONDITIONS OF CONTRACT AND TERMS OF REFERENCE

1. INTRODUCTION

Formal Written Price Quotations are hereby invited to perform the National Institute of Standards and Technology (NIST) Cybersecurity Framework Audit. The audit will be based on the National Institute of Standards and Technology (NIST) Cybersecurity Framework.

2. BACKGROUND

- 2.1. The Cape Winelands (CWDM) has adopted the NIST cybersecurity framework. It will be implementing the tenants of the framework in a phased approach. The framework covers many security features already in practise and introduces new ones. This NIST framework covers cyber security which is a point of concern for the Municipality.

3. SCOPE OF WORK/ TERMS OF REFERENCE

- 3.1. The audit will follow two sections named:

- Cyber activity audit
- Cyber security reediness against the NIST framework

Both sections will focus on assisting the CWDM to improve its ability to manage cybersecurity risks.

- 3.2. The Cyber activity audit will measure the usage of the CWDM network and provide the data needed to evaluate and describe the security culture of the communication technology users. This will include both the usage and the intended usage of cyber resources.

Sections to audit are:

- Audit account logon events
- Audit account management
- Audit directory service access
- Audit logon events
- Audit object access
- Audit policy change
- Audit privilege use
- Audit process tracking
- Audit system events

Review the following on each cyber device to identify risks

1. Basic security audit policy settings
2. View Security event Logs
3. User behaviour audit
4. Data security audit
5. Application use audit.
6. Web usage audit.

Report the risks with regard to

1. Systems security policy
2. User behaviour
3. Network risk and management
4. Change management
5. Network infrastructure and configurations.

6. Recommend strategies to mitigate risks

In addition to gathering data and providing opinions on the data, solutions to infrastructure management is required. Of the many steps required to comply with this audit, the following five solutions must be provided. They represent great ways to help audit-proof the infrastructure as well as increase overall IT quality.

Provide operator access control standards with a flexible and granular permissions model for role-based access control to all network devices and servers. If there is an unauthorized attempt to gain access to the network infrastructure, security and IT staff should be able to detect it and alert the appropriate personnel. The same access controls may be required for technology service providers or outsourcers. Watch out for weak areas where you may have administrative passwords that are shared by multiple operators. These commonly arise in securing Unix servers and network devices, particularly legacy gear that doesn't easily support a central authentication server.

Provide an activity trail with real-time auditing, including a who, what, where and when of all operator activity and infrastructure changes, especially those that could be inappropriate or malicious. Making IT staff responsible for reporting their own activity won't cut it.

Provide a strong change management process by being able to confirm that infrastructure changes go as planned with a real-time, live-network change review.

Provide a mechanism to automatically verify compliance with both external best practices and internal standards. When IT staff members change critical server or network device settings, managers must be able to ensure that they comply with industry best practices and organizational standards. Instead of yearly manual audits, IT staffs should be able to perform daily checks across their infrastructure so they can show they are looking for configuration settings that violate security policy.

Make available on-demand historical reports mechanism that security and IT staff members, as well as auditors, can view upon request to demonstrate that controls and standards have been continuously enforced. The more easily IT can generate these reports, and the less that human input is required to collect the data, the more reliable the results typically will be in the eyes of an auditor.

3.3. Section 2 Syber security reediness against the NIST framework

The NIST CSF Auditor Checklist must be completed.

O. CERTIFICATE OF INDEPENDENT BID DETERMINATION (MBD 9)

- 1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid rigging.
- 5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
