These certificates will be issued on the accounting officer's letterhead with the accounting officer's practice number and contact number clearly specified on the face of the certificates.

### **VERIFICATION OF B-BBEE LEVELS IN RESPECT OF EMEs**

In terms of the Generic Codes of Good Practice, an enterprise including a sole propriety with annual total revenue of R10 million or less qualifies as an EME.

In instances where Sector Charters are developed to address the transformation challenges of specific sectors or industries, the threshold for qualification as an EME may be different from the generic threshold of R10 million. The relevant Sector Charter thresholds will therefore be used as a basis for a potential bidder to qualify as an EME.

- For example the approved thresholds for EMEs for the Tourism and Construction Sector Charters are R2.5 million and R1.5 million respectively.
- An EME automatically qualifies as a level 4 contributor with B-BBEE recognition level of 100% in terms of the Codes of Good Practice.
- An EME with at least 51% black ownership qualifies as Level 2 Contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- An EME with 100% black ownership qualifies as a Level 1 contributor with B-BBEE level of 135% in terms of the Codes of Good Practice.
- An EME that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as Level 1 contributor with B-BBEE level of 135% in terms of Codes of Good Practice.
- An EME that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- An EME is required to submit a sworn affidavit confirming their annual total revenue of R 10 million or less and level of black ownership to claim points as prescribed by regulation 6 and 7 of the Preferential Procurement Regulations 2017.
- An EME that is regarded as a Specialized Enterprise, is required to submit a sworn affidavit confirming their annual turnover/ allocated budget/ gross receipt of R 10 million or less and level of percentage of black beneficiaries to claim points as prescribed by regulation 6 and 7 of the Preferential Procurement Regulations 2017.
- An EME may be measured in terms of the QSE scorecard should they wish to maximize their points and move to a higher B-BBEE recognition level. It is in this context that an EME may submit a B-BBEE verification certificate.

#### **ELIGIBILITY AS QUALIFYING SMALL ENTERPRISES (QSE)**

The Codes define a QSE as any enterprise with annual total revenue of between R10 million and R50 million.

- A QSE with at least 51% black ownership qualifies as a Level 2 contributor.
- A QSE with 100% black ownership qualifies as a Level 1 Contributor.
- A QSE that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as a Level 1 contributor with B-BBEE level of 135% in terms of the Codes of Good Practice.
- A QSE that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- A QSE is required to submit a sworn affidavit confirming their annual total revenue of between R10 million and R 50 million and level of black ownership or a B-BBEE level verification certificate to claim points as prescribed by regulation 6 and 7 of the Preferential Procurement Regulations 2017.

**K. CERTIFICATE OF INDEPENDENT BID DETERMINATION (MBD 9)**

1. This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

## **T. MBD 6.2 DECLARATION CERTIFICATE FOR LOCAL PRODUCTION AND CONTENT FOR DESIGNATED SECTORS**

---

This Municipal Bidding Document (MBD) must form part of all bids invited. It contains general information and serves as a declaration form for local content (local production and local content are used interchangeably).

Before completing this declaration, bidders must study the General Conditions, Definitions, Directives applicable in respect of Local Content as prescribed in the Preferential Procurement Regulations, 2017, the South African Bureau of Standards (SABS) approved technical specification number SATS 1286:2011 (Edition 1) and the Guidance on the Calculation of Local Content together with the Local Content Declaration Templates [Annex C (Local Content Declaration: Summary Schedule), D (Imported Content Declaration: Supporting Schedule to Annex C) and E (Local Content Declaration: Supporting Schedule to Annex C)].

### **1. General Conditions**

- 1.1. Preferential Procurement Regulations, 2017 (Regulation 8) make provision for the promotion of local production and content.
- 1.2. Regulation 8.(2) prescribes that in the case of designated sectors, organs of state must advertise such tenders with the specific bidding condition that only locally produced or manufactured goods, with a stipulated minimum threshold for local production and content will be considered.
- 1.3. Where necessary, for tenders referred to in paragraph 1.2 above, a two stage bidding process may be followed, where the first stage involves a minimum threshold for local production and content and the second stage price and B-BBEE.
- 1.4. A person awarded a contract in relation to a designated sector, may not sub-contract in such a manner that the local production and content of the overall value of the contract is reduced to below the stipulated minimum threshold.
- 1.5. The local content (LC) expressed as a percentage of the bid price must be calculated in accordance with the SABS approved technical specification number SATS 1286: 2011 as follows:

$$LC = [1 - x / y] * 100$$

Where

- x is the imported content in Rand
- y is the bid price in Rand excluding value added tax (VAT)

Prices referred to in the determination of x must be converted to Rand (ZAR) by using the exchange rate published by South African Reserve Bank (SARB) at 12:00 on the date of advertisement of the bid as indicated in paragraph 3.1 below.

**The SABS approved technical specification number SATS 1286:2011 is accessible on [http://www.thedti.gov.za/industrial development/ip.jsp](http://www.thedti.gov.za/industrial%20development/ip.jsp) at no cost.**

- 1.6. A bid may be disqualified if this Declaration Certificate and the Annex C (Local Content Declaration: Summary Schedule) are not submitted as part of the bid documentation;
- 2. The stipulated minimum threshold(s) for local production and content (refer to Annex A of SATS 1286:2011) for this bid is/are as follows:**

**Description of services, works or goods**

**Stipulated minimum threshold**

Wheelie Bins

100%

3. Does any portion of the goods or services offered have any imported content?

(Tick applicable box)

-----	--	----	-------------------------------------

- 3.1 If yes, the rate(s) of exchange to be used in this bid to calculate the local content as prescribed in paragraph 1.5 of the general conditions must be the rate(s) published by SARB for the specific currency at 12:00 on the date of advertisement of the bid.

The relevant rates of exchange information is accessible on [www.reservebank.co.za](http://www.reservebank.co.za)

Indicate the rate(s) of exchange against the appropriate currency in the table below (refer to Annex A of SATS 1286:2011):

Currency	Rates of exchange

BACKGROUND									
The need for, and intention of the procurement and fitment of gravity locking devices for Council's 240 Litre mobile refuse containers (wheelie bins), is to prevent baboons from accessing the bins in the identified baboon prominent areas of the Metro. Due to the relatively low number of lockable bins required (specifically due to the restriction thereof only to baboon prone areas), the City has opted for a Request for Quotation process in terms of procuring new locking kits and having these retrofitted to existing bins, as the need arises in known baboon prominent areas.

Lockable bins for baboon management purposes are issued in terms of the City's Tariff Policy and require a "Baboon Management Team", comprised of specialists from both the City and outside organisations, to strictly control the process in determining the baboon areas to which lockable bins may be issued.

From a practical and experiential perspective, a kit (comprising of a gravity locking system/device) per wheelle bin is required to prevent a baboon from gaining access to the contents of the bin.

Some additional considerations regarding lockable bins:

- # The bin is the property of the City and any alteration/addition must be strictly controlled and consistently applied by the City.
- # In order to facilitate the mechanical loading of the bins, these devices must operate on a gravity/pressure mechanism which, if turned upside down and/or kinetic energy is transferred to the device, activates to open the bin for purposes of removal of refuse by the refuse removal truck.

### MAIN DEFINITIONS

- 1) Gravity lock: A self-activating gravity lock which keeps the lid secured, releases automatically only when the bin is lifted onto and tilted by the refuse removal truck. This allows the lid to open and the bin to be emptied without the operator's intervention.
- 2) Padlock: A detachable lock hanging by a pivoted hook on the object (bin) fastened.

### Lock Specifications

#### 1. LOCKING DEVICE

The gravity locking device has to provide both users and operational crews access, whilst adhering to ALL the following requirements:

- a) Each identified refuse container must be able to be fitted with a kit consisting of a robust, durable, corrosive resistant gravity locking device/kit which will link both open-ended corners (opposite hinges) to the body.
- b) Access must be restricted in the locked mode. Care must also be taken to ensure that the lid cannot be deformed on any of its sides (even when exposed to maximum summer temperatures).
- c) The system must consist of two lockable elements. Element 1 will be gravity-actualised (that will be locked by the user and unlocked by the refuse truck). Element 2 will be the normal padlock that will be locked and unlocked by the key holder (user).
- d) The gravity lock must be designed and operated in such a manner so as to allow the service vehicle/s to conduct a normal bin tipping process when emptying the container to override the gravity locking part of the system.

e) The padlock is a separate part of the locking system. This locking element can be accommodated by a normal padlock (Suggested sizes: 30-32mm/38-40 mm).

f) The gravity and padlock system must be designed and operated in such a manner so as to be protected from direct exposure/contact with waste of any type that could render the device unable to serve its intended purpose.

g) As a safety feature, the device must NOT be able to accidentally lock when the lid is closed. Locking the lid must be an active, purposeful action by a person/user when locking the padlock or/and inserting the cable into the gravity lock.

h) The locking device, as described above, will be required to pass formal evaluation and be approved by the delegated City of Cape Town official/s.

i) The gravity locking devices must be compatible (fit) with ALL Council issued bins.

**2. GENERAL**

Save for the above listed requirements, the gravity locking device has to provide both users and operational crews access to the bin, whilst adhering to ALL the following additional requirements:

- a) Gravity locks must be mounted/fitted externally to all identified bins at the relevant City of Cape Town Solid Waste Management Collections# Depot which will be indicated to the successful supplier by the City#s representative.
- b) No part of the lock or the padlock, or any component of either, to be attached to the bin lid.
- c) No holes may be drilled into the container (body) part of the bin nor into the lid that closes the container.

**3. DEVICE COMPONENTS (all components must be included in each locking kit, per bin)**

All potential suppliers to submit a complete gravity lock device sample, within five business days of Quotation submission, to the relevant City of Cape Town Solid Waste Management Collections# representative for review as part of the evaluation and equipment functionality scoring process.

**1) Waterproof padlock with keys**

A weather proof padlock must serve as additional entry point for the key holder. The padlock keys must be unique with a minimal ratio of 1 out of a 1000 keys before any duplication occurs.

2) Gravity lock

The main gravity lock must be a closed unit that cannot be unscrewed or tampered with. The material used to manufacture the lock must be suitable from a structural and functional perspective, preferably moulded ABS (Acrylonitrile Butadiene Styrene) plastic.

3) Lock plate

A metal plate must be used to secure the lock onto the bin. This plate must be shaped to not protrude from the bin's outer rim profile. This plate must be treated so as to prevent any corrosion. The mounting screw must be stainless steel and not hex, star or flat type driven.

4) Short cable\*

5) Hang tag\*

6) Long cable\*

\* The cable set is comprised of multiple parts (4, 5 and 6), and must serve as a 3 point lock or anchor configuration. The cables must be manufactured from wire steel rope core with coated nylon sleeves. The lock pin on the one end of the short cable must be made from steel and plated to prevent corrosion. A plastic shoulder must assist the user in pushing/locking the pin into the Gravity Lock.
