Inviting of tenders by the Cape Winelands District Municipality (CWDM), all relevant bid documentation, submitting of tenders by prospective bidders, evaluation / awarding of tenders and all subsequent contractual responsibilities regarding supply and delivery of goods and/or services, will be managed in terms of and MUST comply with:-

- Chapter 11 of the Municipal Finance Management Act, 2003 (Act no.56 of 2003);
- Municipal Supply Chain Management Policy of the CWDM;
- Supply Chain Management: A guide for Accounting Officers of Municipalities (Guide for AO's);
- Any relevant Regulations / Circulars issued by the National Treasury, from time to time, and
- Any Special Conditions detailed in this Contract (SCC) – *referring to, but not limited to: paragraphs B.1. - 17. and C to P.*

Where the GCC and SCC are in conflict with one another, the stipulations of the SCC will prevail (chapter 4.5.2.9 – Guide for AO's)

1. Acceptance or Rejection of a Tender

The Municipality reserves the right to withdraw any invitation to tender and/or to re-advertise or to reject any tender or to accept any tender in whole or part.

The Municipality does not bind itself to accepting the lowest tender or the tender scoring the highest points.

The Municipality reserves the right to accept more than one tender (in the event of a number of items being offered).

2. Validity Period

The fact and action of handing in a tender to the Municipality is accepted as a contract between the Municipality and the bidder whereby such a tender remains valid and available for a period of ninety (90) days, calculated from the closing date as advertised for the tender, for acceptance, or non-acceptance by the Municipality. The bidder undertakes not to withdraw, or alter, the tender during this period.

3. Registration on Accredited Supplier Database

It is expected of all prospective service providers who are not yet registered on the Municipality's Accredited Supplier Database to register without delay on the prescribed form.

It will be expected from Suppliers to update registration details every 12 months from date of registration. Payment will not be effected if supplier information is outdated.

The Municipality reserves the right not to award tenders to prospective suppliers who are not registered on the Database.

4. Completion of Tender Documents

The official tender form must be completed in BLACK ink and any corrections to the official tender form must also be made in BLACK ink and signed by the bidder.

Any tender documents received with correction fluid (Tippex) corrections shall be disqualified.

The complete original tender document must be returned. Missing pages will result in the disqualification of the tender.

Any ambiguity has to be cleared with contact person for the tender before the tender closure.

5. Authorised Signatory

A copy of the recorded Resolution taken by the Board of Directors, members, partners or trustees authorising the representative to submit this bid on the bidder's behalf must be attached to the Bid Document on submission of same.

A bid shall be eligible for consideration only if it bears the signature of the bidder or of some person duly and lawfully authorised to sign it for and on behalf of the bidder.

If such a copy of the Resolution does not accompany the bid document of the successful bidder, the Municipality reserves the right to obtain such document after the closing date to verify that the signatory is in order. If no such document can be obtained within a period as specified by the Municipality, the bid will be disqualified.

6. Site / Information Meetings

Site or information meetings, if specified, are compulsory. Bids will not be accepted from bidders who have not attended compulsory site or information meetings. Bidders that arrive 15 minutes or more after the advertised time the meeting starts will not be allowed to attend the meeting or to sign the attendance register. If a bidder is delayed, he must inform the contact person before the meeting commence and will only be allowed to attend the meeting if the chairperson of the meeting as well as all the other bidders attending the meeting, give permission to do so.

All partners or the leading partner of a Joint Venture must attend the compulsory site or information meeting.

7. Quantities of Specific Items

If tenders are called for a specific number of items, the Municipality reserves the right to change the number of such items to be higher or lower. The successful bidder will then be given an opportunity to evaluate the new scenario and inform the Municipality if it is acceptable. If the successful bidder does not accept the new scenario, it will be offered to the second-placed bidder.

8. Expenses Incurred in Preparation of Tender

The Municipality shall not be liable for any expenses incurred in the preparation and submission of the tender.

9. Contact with Municipality after Tender Closure Date

Bidders shall not contact the Municipality on any matter relating to their bid from the time of the opening of the bid to the time the contract is awarded. If a bidder wishes to bring additional information to the notice of the Municipality, it should do so in writing to the Municipality. Any effort by the firm to influence the Municipality in the bid evaluation, bid comparison or contract award decisions may result in the rejection of the bid.

15. Persons in the service of the state

Any person, having a kinship with persons in the service of the state, including a blood relationship, may make an offer in terms of this invitation to bid. In view of possible allegations of favouritism, should the resulting bid, or part thereof, be awarded to persons connected with or related to persons in service of the state, it is required that the bidder or their authorised representative declare their position in relation to the evaluating/adjudicating authority and/or take an oath declaring his/her interest.

16. Broad-based black economic empowerment (B-BBEE) status level certificates

Bidders are required to submit original and valid B-BBEE Status Level Verification Certificates or certified copies of the original, not a photo-copy of another certified copy thereof together with their bids, to substantiate their B-BBEE rating claims.

Bidders who do not submit B-BBEE Status Level Verification Certificates or who are non-compliant contributors to B-BBEE do not qualify for preference points for B-BBEE but should not be disqualified from the bidding process. They will score points out of 90 or 80 for price only and zero (0) points out of 10 or 20 for B-BBEE.

A trust, consortium or joint venture must submit a consolidated B-BBEE Status Level Verification Certificate for every separate bid.

Public entities and tertiary institutions must also submit B-BBEE Status Level Verification Certificates together with their bids.

If an institution is already in possession of a valid and original or certified copy of a bidder's B-BBEE Status Level Verification Certificate that was obtained for the purpose of establishing the database of possible suppliers for price quotations or that was submitted together with another bid, it is not necessary to obtain a new B-BBEE Status Level Verification Certificate each time a bid is submitted from the specific bidder.

Such a certificate may be used to substantiate B-BBEE rating claims provided that the closing date of the bid falls within the expiry date of the certificate that is in the institution's possession.

Each time this provision is applied, cross-reference must be made to the B-BBEE Status Level Verification Certificate already in possession for audit purposes.

AOs / AAs must ensure that the B-BBEE Status Level Verification Certificates submitted are issued by the following agencies:

VERIFICATION OF B-BBEE LEVELS IN RESPECT OF EMEs

In terms of the Generic Codes of Good Practice, an enterprise including a sole propriety with annual total revenue of R10 million or less qualifies as an EME.

In instances where Sector Charters are developed to address the transformation challenges of specific sectors or industries, the threshold for qualification as an EME may be different from the generic threshold of R10 million. The relevant Sector Charter thresholds will therefore be used as a basis for a potential bidder to qualify as an EME.

- For example the approved thresholds for EMEs for the Tourism and Construction Sector Charters are R2.5 million and R1.5 million respectively.
- An EME automatically qualifies as a level 4 contributor with B-BBEE recognition level of 100% in terms of the Codes of Good Practice.
- An EME with at least 51% black ownership qualifies as Level 2 Contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.

- An EME that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as Level 1 contributor with B-BBEE level of 135% in terms of Codes of Good Practice.
- An EME that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- An EME is required to submit a sworn affidavit confirming their annual total revenue of R 10 million or less and level of black ownership to claim points as prescribed by regulation 6 and 7 of the Preferential Procurement Regulations 2017.
- An EME that is regarded as a Specialized Enterprise, is required to submit a sworn affidavit confirming their annual turnover/ allocated budget/ gross receipt of R 10 million or less and level of percentage of black beneficiaries to claim points as prescribed by regulation 6 and 7 of the Preferential Procurement Regulations 2017.
- An EME may be measured in terms of the QSE scorecard should they wish to maximize their points and move to a higher B-BBEE recognition level. It is in this context that an EME may submit a B-BBEE verification certificate.

ELIGIBILITY AS QUALIFYING SMALL ENTERPRISES (QSE)

The Codes define a QSE as any enterprise with annual total revenue of between R10 million and R50 million.

- A QSE with at least 51% black ownership qualifies as a Level 2 contributor.
- A QSE with 100% black ownership qualifies as a Level 1 Contributor.
- A QSE that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as a Level 1 contributor with B-BBEE level of 135% in terms of the Codes of Good Practice.
- A QSE that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- A QSE is required to submit a sworn affidavit confirming their annual total revenue of between R10 million and R 50 million and level of black ownership or a B-BBEE level verification certificate to claim points as prescribed by regulation 6 and 7 of the Preferential Procurement Regulations 2017.

When a person's name has been endorsed on the Register, the person will be prohibited from doing business with the public sector for a period not less than five years and not more than 10 years. F. SPECIAL CONDITIONS OF CONTRACT AND TERMS OF REFERENCE

1. INTRODUCTION AND BACKGROUND

Tenders are hereby invited for the hiring of mechanical and construction plant equipment as specified as and where required within the Cape Winelands District Municipality's area of jurisdiction for the period ending 30 June 2025.

The Cape Winelands District Municipality's (CWDM) jurisdiction includes the local authorities of Stellenbosch, Drakenstein, Breede Valley, Langeberg, and Witzenberg as reflected in Map 1 and CWDM has its own road maintenance teams situated in Stellenbosch, Paarl, Worcester, Robertson and Ceres performing a road maintenance function on the provincial road reserves.

Map 1: Jurisdiction of Cape Winelands District Municipality (DC2) that includes the local authorities of Stellenbosch, Drakenstein, Langeberg, Breede Valley and Witzenberg.

2. PURPOSE OF THE TENDER

The purpose of this tender is to appoint service providers for the hiring of mechanical and construction plant equipment as specified by Cape Winelands District Municipality (CWDM) as and where required within the CWDM's area of jurisdiction. The equipment plant is required for road construction, road maintenance and other works within the CWDM's area of jurisdiction.

3. SCOPE OF THE WORK/SPECIFICATIONS

3.1 Definitions

3.1.1 "CONTRACTOR" means the successful tenderer responsible for the satisfactory execution of his duties as laid down in this specification.

3.1.2 "COUNCIL" shall mean the Cape Winelands District Municipality

3.1.3 "WORKING DAY" shall mean a normal weekday commences at 07:30 and finishes at 16:30 (excluding public holidays and Friday's).

3.1.4 "MACHINE SHIFT" shall mean minimum 8 hours per day, unless the duly authorised Engineer/Head in Charge of Technical Serices specifically requests alternative working hours.

This implies that the machine will normally be paid for on the basis of 8-hour machine availability i.e. after allowing ½- hour for tea/lunch-breaks. The above applies on provision that the operator plus machine is available for the full duration of the shift.

In the event of not working a full 8 hour shift, a pro-rata payment will be calculated.

3.1.5 "MACHINE SHIFT: SIGNING ON AND SIGNING OFF". The actual working hours will be arranged with the contractor but will be expected to conform as closely as possible to those hours mentioned in 3.1.4.

The actual shift hours shall commence when the equipment is "signed-on" by the duly authorised council official and terminate when the equipment is "signed-off".

The period elapsed between signing the machine "ON" and "OFF" will therefore normally correspond to the standard machine shift hours unless longer hours are worked.

Should longer hours be worked as authorised by the duly authorised Cape Winelands official of the Technical Department in the applicable region, then extra time is payable.

3.1.6 Extra Time: This is the time worked outside the standard machine shift hours (3.1.5). The extra time is accounted for after the standard shift hours have elapsed and the standard hourly standby/working rates apply.

3.1.7 Overtime: Week-end work, public holidays and extra-time that extends beyond council's normal site working day (3.1.4) is regarded as overtime. The normal working/standby hourly rates apply.

3.1.8 "MACHINE WORKING TIME": This is the time actually worked by the plant on a machine working day. The hours will be determined from acceptable measuring equipment (Standby intervals that do not exceed 5 minutes will be considered as working time.) Only block recordings within the signing ON/OFF period will be totalled.

3.1.9 "DOWNTIME": This is deemed to be the unavailable and unproductive time period that arises out of time lost due to servicing, tyre repairs, refuelling, inclement weather, defaulting operators, mechanical breakdowns or any other time lost which in the opinion of the municipal manager or his duly authorised representative does not arise from any action of the council. This will be deducted from the minimum 8 hours per day payment.

3.1.10 "STANDBY": This is the time that the machine stands while waiting in attendance on the work i.e. the machine is available but idle (only idle intervals exceeding 5 minutes will be regarded as standby). This does not include downtime or time lost due to inclement weather. Standby will be computed as follows:

STANDBY HOURS = MACHINE SHIFT HOURS (3.1.4)

LESS hour (tea/lunch-break)

LESS downtime (3.1.9)

LESS Machine working time (3.1.8)

3.1.16 Inclement Weather

This is regarded as unavailable time and the contractor will be advised of council's intention not to use the machine.

Loss of machine production due to poor ground conditions caused by flooding etc, even though the weather has cleared, will be regarded as standby, unless the hire has been terminated.

3.1.17 Servicing and Refuelling

Refuelling and machine servicing should be done before or after work or during lunch-breaks. Should the contractor deviate from the above, then the downtime will be recorded. All machines should be quoted inclusive of fuel, oil and operator.

The council shall not be held responsible for the safeguarding of equipment. Should the contractor store his equipment after hours at the council's work site/yard, then he does so at his own risk and council shall not be held liable for the risk of loss or damage to the plant. The storage of contractor's fuel, materials and equipment at council's yard/site shall be solely at the discretion of council's duly authorised official of Technical Services.

In the event of poor storage facilities existing at the work site, the contractor must make whatever arrangements he may deem necessary for the safekeeping of his material and equipment.

Reports received from the field on unsatisfactory service will be kept and repeated reports will result in the contractor being ordered off the site.

The contractor will be advised immediately of all breakdowns. The contractor is expected to rectify or replace the defective component/equipment or plant with a minimum of delay.

Failure by the contractor in complying with the following will result in the machine either being "paid off" or the machine being stopped and booked as unavailable pending the urgency of obtaining a substitute machine.

Machine breakdowns, tyre and tube repairs must be attended to immediately after the report has been received. The contractor must advise the duly authorised site engineer/works superintendent immediately if difficulty is likely to be experienced in recommissioning/supplying substitute equipment within 24 hours of the breakdown.

In the event of any item of plant breaking down on the job, the contractor shall replace the broken-down plant with plant of the same type and size to meet the requirements of the duly authorised engineer/head in charge of Technical Services. The council will not be debarred from entering into additional contracts with other contractors for the provision of conveyance and cartage, either in conjunction with vehicles under the contract or elsewhere, as the council's needs may require.

Contractors must advise council in writing, giving all details of plant scrapped and replacement equipment purchased, before consideration will be given to the acceptance of the new equipment on contract. Additional equipment will not be considered for acceptance after the closing date of the tender.

3.1.22 Transportation

The contractor shall nominate the premises at which his plant will be available for hire and shall state the rate on a kilometre basis for transporting the plant from these premises to council's work site. If an escort vehicle is necessary, this rate must include such an escort.

The rate shall be inclusive of plant delivery and collection costs. Payment shall be based on the single one-way distance from the contractor's premises to site only. The same rate shall apply whether the plant (rubber-tyred) travels under its own power or is alternatively transported using the contractor's mechanical horse and low-bed trailer.

The shortest possible route must be used in all cases. The machine will be regarded as being unavailable whilst in transit and no hire charges shall apply.

A separate invoice/delivery note is required in respect of transportation charges.

No transport charges are applicable in respect of trucks and transport charges in getting the vehicle from the contractor's premises to and from the work site, are for the contractor's account.

In the event of the time recording instruments failing during any one working day, the working/standby times will be estimated by the operator/duly authorized engineer/works superintendent who must mutually agree and endorse the log sheet and card accordingly. These times will then form the basis of payment.

3.2 Vehicle, Plant and Equipment Requirements

3.2.1 All mechanical equipment and construction plant must be in good working order complete with experienced operators and attendant labour where necessary.

3.2.2 Time Recording Instruments

The successful tenderer is obliged to fit acceptable time-recording instruments to his equipment.

The tender schedules reflect the plant categories that require time recording instruments to be fitted.

All equipment arriving at the work site without an approved time recording instrument will be turned away and council will not be held liable for any transportation costs whatsoever. Equipment arriving on site with defective instruments will not be accepted until such time as the instrument has been repaired / replaced.

Contractors who are notified at the end of the day of defective time-recording instruments must ensure that the instruments are either repaired/replaced by no later than 12h00 on the following day. Failure to comply will result in the machine being stopped and booked as unavailable or paid off.

3.2.3.4 Truck Capacity Certificates

The capacity of a truck as expressed in cubic metres shall be calculated to the nearest cubic metre as the legal certified payload divided by 1679 kg/cu.metre and if a body larger than this calculated volume is fitted, a permanent mark shall be made inside the body to indicate its volume. This calculated volume shall be displayed in conspicuous places on both side of the exterior of the body.

Tenderers/contractors in possession of existing capacity certificates need only produce the current certificate of fitness plus the existing capacity certificate to the duly authorised Site Engineer/Works Superintendent for renewal.

Tenderers not in possession of existing capacity certificates shall submit all vehicles (including sub-contractor's vehicles) for examination to the duly authorised site engineer/works superintendent, where the necessary data as regards G.V.M., Tare and axle loadings will be recorded. The body size will be measured to establish whether the correct capacity is available. (Body side extensions that are not permanent fixtures will be

disallowed). The current certificate of fitness is to be made available at this time for scrutiny. The Tenderer/Contractor warrants that he is aware that this data will be the basis for the issue of a certificate by the municipal manager of council or his authorised representative, bearing the capacity and relative data. This certificate is to be kept in the vehicle and shown on demand to the council's officials when the vehicle is used under contract. The capacity calculated as described above will form the basis of payment in terms of the contract. 10. PRICING INSTRUCTIONS

The basis of hire shall be as shown below. Tenderers that offer equipment and plant for hire on a basis other than specified will result in Council rejecting their tenders.

If any products/services will be rendered at no charge, in such an instance the price should be indicated on the pricing schedule as R0.00.

If any products/services will not be tendered on, in such an instance no quote should be indicated on the pricing schedule.

- Rates to be paid

Depending on the different factors, the municipality will issue an order indicating the manner in which the plant will be remunerated which will depict whether the plant will be paid as a wet rate and therefore the supplier will supply the fuel, or a dry rate and the municipality supplies the fuel. In the case of a dry rate, the supplier will supply the plant with a full tank of diesel, and the municipality will return the plant with a full tank of diesel. In the case of the wet rate, the onus lies with the supplier to manage the fuel usage and top up the fuel in a manner which does not result in down time. The Municipality will remunerate the supplier the Wet Rate priced.

- Dry Rates

Equipment working on a dry rate will be paid on the basis of a working time hourly rate and a standby hourly rate less downtime rates. The hours applicable to the hire of plant is defined in Sections (3.1) and the time recording instruments that are required to be fitted are detailed in Section (3.2.2). This rate excludes fuel.

- Diesel Rates

The hours will be equivalent to the hours claimed for working on a dry rate and will be paid on the basis of a working time hourly rate and a standby hourly rate less downtime rates. The sum of the dry and diesel rates should be equal to the wet rate. The hours applicable to the hire of plant is defined in Sections (3.1) and the time recording instruments that are required to be fitted are detailed in Section (3.2.2).

- Wet Rates

Equipment working on a wet rate will be paid on the basis of a Working Time Hourly Rate and a Standby Hourly Rate Less Downtime rates. The hours applicable to the hire of plant is defined in Sections (3.1) and the time recording instruments that are required to be fitted are detailed in Section (3.2.2). This rate includes fuel, operator, plant, and maintenance (all inclusive).

- Daily Rates (Rate per day)

Vehicles and equipment working on a daily basis shall be paid per day or part thereof. The hours of work shall conform to the site working day. (Section 3.1.4). Standby rates are not applicable with daily rates. This is all inclusive as in the wet rate.

- Kilometrage Rates

Transportation charges in respect of the authorised movement of the contractor's plant from the contractor's premises to the council site and return shall be paid on a one-way kilometre basis as defined in Section (3.1).

- Kilometre - Lead Rates

Vehicles operating on a kilometre/lead basis will be paid for the volume of material conveyed.

The rate per cubic metre for a specific truck multiplied by the number of trips recorded over the set distance will be calculated to determine the payment.

A trip is measured as the single one-way distance between loading and offloading points. The cubic capacity of the vehicle is as determined and recorded on the capacity certificate.

Council's duly authorised engineer/head in charge of Technical Services in his sole discretion shall decide whether a truck is to be hired on a kilometre-lead basis or by the day or combination thereof (e.g. km-lead morning, part of the day, in the afternoon). The lead distance rate will apply when the daily rate is exceeded. The contractor shall be advised beforehand of Council's intention.

The tenderer shall quote for an "all in working" (hourly/daily/cubic metre/ kilometre - lead) rate that is inclusive of fuel, oil, grease, ground contact spares, operator insurance, servicing and repairs.

The periods of hire in the prescribed pricing schedules are just estimates based on historical trends that will be used for evaluation purposes only and should not be used for tender pricing purposes. The District Municipality reserves the right to increase or decrease the periods of hire at its discretion, in order to meet operational requirements. In the case of an increase in periods of hire, prices per item must be charged at the same rate as the original prices quoted.

The Bidder is to specify the Category of plant equipment he/she will be placing a Bid for in the Returnable schedule before the pricing schedule.

11. PRICE ESCALATION

The prices contained in this tender document must be firm for at least the first 8 months since commencement of a contract.

The Contract Price shall be subject to price adjustment for variations in the cost of Mechanical equipment hire. The Plant and Equipment index of the statistical release, P0151.1 Construction Materials Price Indices, Table 4 - Mining and construction plant and equipment price index, will be used to determine the variations in cost. The base month will be the month of the tender closure.

O. CERTIFICATE OF INDEPENDENT BID DETERMINATION (MBD 9)

- 1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid rigging.
- 5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.
² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
